REPUBLIKAN VENOM

and Hobday. The minority submitted education and experience along that particular line makes the position and experience along that particular line makes the position of superintendent of such a system of water works as Salt Lake City peacesses on the matter with the simple statement that it did not think the apportionment was fair.

For plumbing inspector we are asked to

"RICHARD P. MORRIS. "Mayor.

Removal of Kelsey.

METEOROLOGICAL REPORT

at a large expense to the city, both in money and lime.
Our waterworks system is a most lutricate one, covering a great deal of ter-IFAPED UPON THE MAVOR

(Continued from Page 1.)

Tee of five on appointments reported against confirmation of the mayor's appointments. It was signed by Councilment Preces (Chairman). A. J. Davis and Hobday. The minority submitted

DISCOVERY IS MADE BY WELL

DIGGERS.

Of the matter with the simple statement that it did not think the apportionment was fair.

Without any comment the majority report was adopted by a vote of nine to five, the Republicans voting against the mayor.

"I ask what they think is fair" asked Councilman Fernstrom.

"I ask what they think is fair" asked Councilman Fernstrom.

"I move the previous question," said to be thirty inches across and running 12.7 per cent copper. At current market values this ore is worth over \$30 a ton.

The ledge was found by workmen digging a well. They took out some of the ore and took it to William M. Thompson, secretary of the Consoli-

The ledge was found by workmen digging a well. They took out some of the ore and took it to William M. Thompson, secretary of the Consolidated Mercur company. He had it assayed, with the result that it was slown to contain the high percentage of copper mentioned. Nothing has been done as yet to develop the discovery, but steps may be taken to determine whether rich copper mines do not undefle a large portion of Salt Lake City.

"The man who brought the ore to me," said Mr. Thompson yesferday, "stated that the well had been dug out to a depth of about seventy feet when the ledge or vein was encountered. Sinking was continued until the foot wall was reached, the ore proving to have a thickness of thirty inches, From the description of the vein given. I judged that it had a southwest and northeasterly course, and that its dip was to the northwest.

Samples Run Up Well.

Turns Down Appointments.

Samples Run Up Well.

"The men who did the work had little notion of the value of the stuff, neither of them having had any mining experience." It was only because the blue and green colors attracted their attention that they saved any of the rock or asked any questions. We sent samples to Mercur and the returns given us showed the presence of nearly 13 per cent coppet—12.7 per cent.

"The proposition was looked into a little, but the conclusion was reached that the ore, being so well within the city limits, and the section around it being so well fullt up, it was not worth while to tackle it as a mining proposition."

In a northeasterly direction from the section named it is no great distance to the limits of the built up portion of the city, and the vein might be traced out in the foothills. Worse pointers than this have led to the opening of the council into doing his was to have a change."

Turns Down Appointments.
